

Medical Therapeutic Lasers

Laser Therapy Training Course
for Vets, Vet Nurses and Practice Managers

5 June 2018

Benchmark House, Sheffield

A one-day course combining state of the art review seminars with hands-on practical instruction

What is Laser Therapy?

Class IV lasers deliver specific red and near infrared wavelengths of laser light to induce a therapeutic effect within the patient's body, including; increased circulation, decreased swelling and inflammation, reduction of pain and enhanced tissue repair.

Laser therapy is used for a wide range of applications, including; osteoarthritis, pain management, post-surgical rehabilitation, dental/stomatitis, acute and chronic wound healing and lameness.

What will I learn on the day?

- Science behind laser therapy
- Clinical benefits of laser therapy for patients
- Practical implementation of laser therapy in practice

ONLY
£199 + VAT
