

# Christmas Decorations

**Fallen Christmas tree needles are very sharp and can easily get stuck in your pet's paws or throat**

**Make sure you cover up electric cords from the tree lights so your pet can not chew them and electrocute themselves.**

**Pets may show an interest in decorations hanging from your tree. Try to use unbreakable decorations and nothing too small as these can shatter in your pet's mouth or cause a blockage if swallowed.**

**Make sure your tree is well anchored so your pet can not pull it over.**
