Long term medication and repeat prescriptions

Where your animal's health is our top priority.

Long term medication

Your pet has been prescribed medication which is likely to be needed for a prolonged period or for the lifetime of your pet.

To ensure that your pet receives the best possible care we will ask to you to come in for a prescription health check every 3 months. This appointment is with a vet, who will examine your pet and talk to you about the prescribed medication and health of your dog or cat.

This appointment is necessary to review your pet's condition and to ensure that the medication is still necessary and being prescribed and administered at the correct dose and frequency. Some medications are associated with possible adverse effects and we want to minimise these as much as possible—the vet will check for any side effects at the time of examination.

Sometimes the vet will recommend regular blood or urine tests to check for side effects or to check the appropriate dose is given.

This appointment is also an opportunity for you to ask any questions about the specific condition your pet is being treated for as well as anything regarding their general health.

Repeat Prescriptions

Repeat prescriptions should be requested by phoning the surgery where you would like to collect your medication, or by filling out the form on our website

PLEASE ALLOW 48 HOURS FROM THE TIME OF ORDERING BEFORE COLLECTING YOUR PET'S MEDICATION. THIS IS SO THE MEDICATION WILL BE READY FOR YOU AND WILL HAVE BEEN CHECKED AND AUTHORISED BY THE VET

Please bear in mind that if we have not seen your pet in the last 3 months we may not be able to provide you with a repeat prescription until a prescription health check has been carried out.

If you have any questions about your pet's medication, please do not hesitate to call the
